

## **Healthlink360**

We as a young family living overseas have received medical care, support and advice from HL360 since 2009. The level of commitment and dedication of the staff in medical care, support and advice as we prepared, lived and worked overseas and upon our return has been unprecedented. Services are provided in a professional and confidential environment. Every aspect of the HL360 from its administration to its medical services, are tailored to the support of clients. In our experience the approach of HL360 to its clients is well rounded and holistic, caring not only for the medical needs but also the emotional and spiritual wellbeing.

We would recommend HL360 to anyone who is seeking to, or working overseas in a resource-limited country. The expertise of the personnel will give you satisfaction and peace of mind that you are in very capable hands and, as a client, quality advice is always only an email away.
